Summary

Detail-oriented professional with a background in Statistics and Data Science, experienced in data entry, database management, and reporting. Skilled in Excel, SQL, and data processing tools with a strong focus on accuracy, organization, and operational efficiency. Seeking an opportunity in Operations, Data Entry, or Master Data roles within a structured business environment.

Work Experience

Data Entry & Operations Assistant

Trikala, Greece

Kotoulas Energy S.A.

Feb 2024 - Oct 2024

- Maintained and updated customer and operational data using ERP system (Galaxy), ensuring data accuracy and consistency.
- Analyzed customer purchasing behavior after **price adjustments of 5–15%**, identifying trends that influenced fuel consumption and sales.
- Created **weekly and monthly** performance reports, delivering insights that helped the owner optimize pricing strategy and contributed to a **10–20% improvement** in price-change decision speed.

E-Advisor Intern

Athens, Greece

Alpha Bank

June 2020 - Dec 2020

- Developed strong analytical and communication skills while assisting clients with digital banking services.
- Strengthened interpersonal and problem-solving skills, elevating customer satisfaction in a hands-on internship role.
- Gained insights into the financial industry and honed problem solving abilities.

Projects

EV Charging Demand Forecasting (Master Thesis)

Nov 2024 - Feb 2025

- Developed an end-to-end **EV charging demand forecasting pipeline** using **real-world time-series data** from 27 stations, applying a **Hybrid LSTM model** that achieved **RMSE of 3.22 kW** and **96.29% F1-score** for occupancy prediction.
- Technical Skills:** Python, Time-Series Analysis, Feature Engineering, Statistical Modeling, Data Cleaning, EDA

Temporal Network Analysis and Link Prediction

Jun 2023 - Nov 2023

- Performed temporal network analysis and link prediction on a **63.5M** row dataset, utilizing time-aware centrality measures and three data creation strategies. Achieved **86.56%** accuracy with an **ANN**, surpassing **LR (79.88%)** to enhance network dynamics understanding and connection prediction.
- Technical Skills:** Python, NetworkX, Network Analysis, Temporal Dynamics, Machine Learning, Model Evaluation

Maritime Data Analysis and Vessel Location Prediction

Jan 2023 - Sep 2023

- Developed a comprehensive database from **raw AIS data** collected at the University of Piraeus, followed by EDA and data cleaning. Leveraged this refined dataset to build a **Bi-GRU** predictive model, achieving an RMSE of **23.21** meters, effectively anticipating vessel locations for **35** vessels.
- Technical Skills:** PostgreSQL, QGIS, Python, GeoPandas, Data Cleaning and Enrichment, Deep Learning

Technical Skills

Programming Python | SQL | MATLAB | Scala (Basic)

Databases PostgreSQL | MongoDB | QGIS

BI Tools Power BI | Excel (Pivot Tables, Power Query) | SAS | SPSS

Education

MSc in Cybersecurity & Data Science

2022 – 2025

University of Piraeus

BSc in Statistics and Finance

2015 – 2022

University of Piraeus

Languages

English Fluent (C2)

German Beginner (A1.2) — Currently learning

Greek Native
